Notice of Commencement of Negotiations for Architectural Services

Notice is hereby given of the commencement of negotiations for architectural services for the Kansas Department of Transportation in Liberal. The shop is proposed to be constructed on 16 acres near the US-83 Bypass in the southeast quadrant at 15th and Calvert Street in Liberal. The building will have approximately 8,680 square feet of space. The space will be subdivided into 4,260 square feet of insulated, weatherproof, air-conditioned office and storage area, and six 45' x 16'4" equipment bays. At least two of the bays will be heated and one will be designed as an equipment wash bay. The subarea crew, the area construction office and laboratory, and the Kansas Highway Patrol will use the office area. The building also will include material and parts storage and garage space for subarea trucks. The bays are sized to house dump trucks equipped with snowplows and material

The type of building and configuration will generally be left to the project architect to decide, based on the site, neighboring structures and budget limitations. The total budget for this project is \$1,641,587, with a construction budget of \$1,452,732.

For information regarding the scope of services, contact Jaci Vogel, Construction and Maintenance, Kansas Department of Transportation, (785) 296-3576.

State Corporation Commission

Notice of Hearing on Proposed Administrative Regulations

A public hearing will be conducted at 10 a.m. Thursday, February 8, at the State Corporation Commission office, 1500 S.W. Arrowhead Road, Topeka, to consider the adoption of proposed permanent regulations for the conservation of crude oil and natural gas.

The 60-day notice period from the date of this publication to the date of the public hearing constitutes a public comment period for the purpose of receiving written public comments on the proposed rules and regulations. Comments may be submitted to Diana Edmiston, Senior Assistant General Counsel, State Corporation Commission, Room 2078, Finney State Office Building, 130 S. Market, Wichita, 67202.

Any person requiring special accommodations under the Americans with Disabilities Act needs to give notice to the commission at least 10 days prior to the scheduled hearing date. The Kansas Relay Center can be accessed for assistance in communicating over the telephone with individuals with a hearing or speech impairment at 1-800-766-3777. Copies of the proposed regulations and the economic impact statements may be obtained at the Wichita address above. Persons requesting a copy of the proposed regulations and economic impact statements, in accordance with K.S.A. 45-129, will be required to compensate the commission for the cost of reproduction. All interested parties will be given a reasonable opportunity at the hearing to present their views orally or in writing in regard to the adoption of the proposed regulations.

All written or oral comments submitted by interested parties on or before February 8 will be considered by the commission as a basis for making changes to these pro-

posed permanent regulations.

The following is a brief summary of the proposed reg-

ulations and economic impact statements:

K.A.R. 82-3-133. The amendment includes minor wording and sentence structure changes for clarification. It also adds subsection (d), requiring any action taken by the commission under this regulation to be in accordance with the Kansas administrative procedure act.

Economic Impact Statement: Amendments to this regulation will have no economic impact on either the

agency or the industry.

K.A.R. 82-3-133a. This is a new regulation that allows the commission to determine whether a well subject to statewide rules has over produced or under produced its assigned allowable. The regulation establishes balancing periods for both oil and gas production and provides for the cancellation of underage. Wells that are in an over produced status at the end of a balancing period are subject to the unlawful production provisions of K.A.R. 82-3-133.

Economic Impact Statement: The regulation could have an adverse economic impact on industry by canceling allowable that was not produced during the balancing period. Currently, this unproduced allowable could be produced for a longer period of time before cancellation.

K.A.R. 82-3-201. The amendment clarifies that this regulation applies only to oil wells producing in a prorated

area.

Economic Impact Statement: Amendments to this regulation will have no economic impact on either the

agency or the industry.

K.A.R. 82-3-206. The amendment increases the oil conservation assessment from 27.27 mills to 68.00 mills on each barrel of crude oil or petroleum marketed or used each month.

K.A.R. 82-3-307. The amendment increases the gas conservation assessment from 5.83 mills to 9.30 mills per 1,000 cubic feet of gas sold or marketed each month.

Economic Impact: The increase in the oil conservation assessment and the gas assessment will increase costs to the industry. Taken on a per well basis, the oil assessment on an average well producing 15 barrels of oil per day would increase \$18.57 per month and the gas assessment on a well producing 300 mcfd would increase \$31.64 per month. (Approximately 97 percent of all gas wells in Kansas produce 300 mcfd or less and approximately 98 percent of all oil wells in Kansas produce 15 barrels of oil per day or less.)

Increases in the oil conservation assessment and gas conservation assessment are necessary to allow the Conservation Division to maintain operations at current levels, to implement federally mandated programs such as the Safe Drinking Water Act and production waste programs, and to continue the conservation fee fund at appropriate levels. There is no economic impact on the general public.

K.A.R. 82-3-300. This amendment added subsections (4), (A), (B) and (b). These new subsections permit assigning an allowable to a replacement well after the operator provides documentation that the operator has plugged the original well, caused the productive perforations to be squeezed, or otherwise isolated the productive zone or an affidavit filed with the commission stating the well is disconnected and surface equipment is sealed in preparation to be plugged or returned to other use within one year of the date of being sealed. Accumulated overage or underage shall be transferred to the replacement well. Minor wording changes were made to other subsections in this amendment for clarification.

Economic Impact Statement: There will be an economic benefit to both the industry and the agency. Currently, an operator must file an application to have an allowable assigned to a replacement well and to transfer any accumulated underage. The amendment will eliminate the filing of an application and the application process.

K.A.R. 82-3-306. This amendment allows the reporting of gas volume to be done in electronic format. The amendment also allows the commission to direct any party who owns, maintains or operates the metering device used to record gas produced from wells under statewide general rules to file a volume report showing the amount of gas actually metered on each lease or well for a specified time period.

Economic Impact Statement: Allowing gas volumes to be reported in electronic format will have a small economic benefit for both the industry and the agency by

eliminating some paper reports.

K.A.R. 82-3-310. This amendment eliminates the mandatory filing of pipeline maps and requires filing only when requested by the Conservation Division. The amendment also allows the commission to specify the size and scale of the maps.

Economic Impact Statement: Amendments to this regulation will have no economic impact on either the

agency or the industry.

K.A.R. 82-3-312. This amendment increases the allowable for nonprorated gas wells from 25 percent to 50 per-

cent of the well's open flow.

Economic Impact Statement: There will be a great economic benefit for the industry since the amendment will double the gas allowable for nonprorated wells. This will make these wells more economic to produce and drill. There is no economic impact to the agency.

expressed as a percentage.

(2) "Commercial bakery oven facility" means an establishment that is primarily engaged in the manufacture, for sale at wholesale or retail, of fresh or frozen bread, bread-type rolls, or dry bakery products, including biscuits, crackers, or cookies, in which the products are made using yeast leavening.

(3) "Spike yeast" means any yeast added to the dough

beyond the initial yeast added to the dough.

(4) "Spiking time" means the elapsed time between the addition of the spike yeast to the dough and the placement of the dough into the oven.

(1) Is operating in either Johnson or Wyandotte

county, or both; and

(2) has bakery ovens with a total potential-to-emit for volatile organic compounds (VOCs) equal to or greater than 100 tone per year.

than 100 tons per year.

(c) (1) Determination of commercial bakery oven facility potential-to-emit. The owner or operator of each commercial bakery oven facility operating in, or proposed for construction or modification in, the area defined in paragraph (1) of subsection (b) shall calculate the facility's

total potential-to-emit (PTE) for VOCs in tons per year, using either the following equation and the presumptions in paragraph (2) of this subsection, or an EPA administrator-approved alternative method if the use of that alternative method is approved in writing by the department for this purpose:

attention and purpose.		the contract of the contract o
PTE _{Facility} (in tons/year)	= `	Sum of PTE_{VOC} for all ovens (in tons/year)
Where: PTE _{voc}	, =	$P_A \times EF_{VOC}$ (in pounds of VOC/ton of baked bread \times 1 ton/2000 pounds)
$\mathbf{P}_{\mathbf{A}}$. =	maximum annual production rate for the yeast-leavened fin- ished bakery product (in tons/ year)
EF _{voc}		VOC emission factor for the yeast-leavened finished bak- ery product having the highest
$EF_{voc} = 0.95Y_i + 0.195t_i -$	0.51S -	emission potential (in pounds of VOC/ton of baked bread) - 0.86t _s + 1.90
Where: Y _i		initial baker's percent of yeast to the nearest tenth of a per- cent;
t	=	total yeast action time in hours to the nearest tenth of an hour;
S	= '	final (spike) baker's percent of yeast to the nearest tenth of a percent; and

(A) Each facility production line is operating 8,760

hours per year at maximum capacity.

(B) Each facility production line is producing the product with the highest level of VOC emissions of those product with the highest level of VOC emissions of those productions.

ucts that it may produce.

- (d) Control requirements. Each commercial bakery oven facility subject to this regulation shall install and operate VOC emissions control devices for each bakery oven to achieve at least an 80% total removal efficiency on the combined VOC emissions of all baking ovens, calculated as the capture efficiency times the control device efficiency.
 - (e) Time for compliance testing.
